    <refbody>
        <section>
            <p>When you load this page for the first time, the <uicontrol>Customer
            Defined Aid Years Enabled</uicontrol> check box will be the only field
            enabled, and the check box will be cleared. All other fields within the page
            are disabled until you select the check box.You can define the use of a
            prefix or suffix for the aid year, and you can define when to start using
            the customer-defined aid year by entering an aid year end year.For example,
            if you want to start using Customer Defined Aid Years for the 2026-2027 aid
            year, you would enter 2027.</p>
            <p>In the Prefix or Suffix for Aid Year section, you can enter your own
            two-character code and description to be used as a prefix or suffix. You
            cannot modify a code after it is saved, but you can modify the description.
            </p>
            <note type="note">If you enable Customer Defined Aid Years, you must enter
            data in all fields on the page.</note>

                            <entry>Customer Defined Aid Years Enabled</entry>
                            <entry>(ROBCDAY_ENABLE_IND)This is the Customer Defined Aid
                            Years Enabled check box. When selected, Customer Defined Aid
                            Years are enabled.</entry>
                        </row>
                        <row>
                            <entry>Use Prefix or Suffix</entry>
                            <entry>(ROBCDAY_PREFIX_SUFFIX_IND)<p>These option buttons
                            determine how custom-defined aid years are formatted by
                            default—either with a Prefix or a Suffix.</p>
                            <p>Prefix: The aid year code is placed before the ending aid
                            year.</p><p>Suffix: The ending aid year is placed after the
                            aid year code.</p>
                            <p>Example:</p><p>If the ending aid year is 2027 and the
                            code is MA:</p><p>Selecting Prefix will generate MA27</p><p>
                            Selecting Suffix will generate 27MA</p>
                            </entry>
                        </row>
                        <row>
                            <entry>Beginning Aid Year End Year</entry>
                            <entry>(ROBCDAY_START_YEAR) This is the field that you
                            define the end year that the Customer Defined Aid Year
                            should begin. For example, if you want to start  using
                            Customer Defined Aid Years for the 2026-2027 aid year, you
                            would enter 2027.</p>
